Early Communication Skills for Children With Down Syndrome: A Guide for Parents and Professionals Libby Kumin

For children with Down syndrome, communicating is just as urgent and essential as it is for anyone else. In the newly updated and expanded edition of *Communication Skills in Children with Down Syndrome*, Libby Kumin offers comprehensive, authoritative, and practical advice based on her nearly 25 years of firsthand experience with kids with Down syndrome. She explains the role of a SLP, the stages of communication development, and how certain characteristics of Down syndrome, such as low muscle tone, hearing loss, and cognitive delays, can slow progression of those skills. Delays can lead to frustration and other problems for children who do not have intelligible speech until age 2 or later.

EARLY COMMUNICATION SKILLS FOR CHILDREN WITH DOWN SYNDROME focuses on speech and language development from birth through the stage of making 3-word phrases, which is often around kindergarten age, but can occur later. This book offers a wealth of information on intelligibility issues, hearing loss, apraxia (difficulty planning oral-motor movements), and other factors that affect communication for children with Down syndrome. It explains how to prepare for and understand the results of speech-language assessment, and goes on to describe what to expect in the years ahead when a child enters elementary school.

Throughout the new edition, the author incorporates the latest research on Down syndrome and communication development. She has added new chapters on high- and low-tech augmentative and alternative communication options, as well as articulation and literacy (how reading aids in the learning of language, speech, and auditory skills). New checklists on evaluating and treating speech problems, and numerous home activities designed to help children master each stage of communication development have also been added.

David Peacock:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's spirit or real

their hobby. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading is not important, boring as well as can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Early Communication Skills for Children With Down Syndrome: A Guide for Parents and Professionals can make you experience more interested to read.
