What Is It About Tribes? Bonnie Benard

This book, researched and written by Bonnie Benard, is an in-depth response to questions that more and more people, concerned today about improving the quality of education, have been asking. In one way or another many have been inquiring, "What is it about the process of "Tribes" that makes it work so well in so many schools, cultures and countries? What is it that helps all kinds of kids finally love learning and achieve? What is it that makes teaching easier and more enjoyable for teachers?" We knew that there was only one person who could help us to respond by documenting the efficacy of the approach underlying the process known simply as "Tribes" or formally as Tribes Learning Communities®. Of course, we called upon Bonnie Benard of West Ed, who with her amazing contextual skills brought hundreds of research studies and literature references into enlightening coherence. It is our hope that readers will discover why and how implementing the core components of the process of Tribes transforms people, classrooms and schools – not because the approach is a curriculum to be taught or a program to be replicated – but because it is an on-going student-centered active-learning process that everyone in a school lives daily and owns. This book also will prove to be invaluable in the writing of grants, accessing other resources, designing topical parent, community and district programs. More than all, we hope as you deepen your understanding of the transformational process, you will use it in endless ways to enhance belonging, student motivation, competence and meaningful learning. Keep in mind the advice that experienced Tribes teachers often tell new teachers.... "Trust the Process – It works." Jeanne Gibbs, Developer Tribes Learning Communities
