Nature's Chemicals: The Natural Products that Shaped Our World Richard Firth

Natural Products (NPs) is the term used to describe the hundreds of thousands of chemical compounds or substances that are continually produced by living organisms (plants and microbes). Hundreds of millions of tons of these chemicals are generated annually, and the trade in just a few of these has dominated human economic activity for thousands of years. Indeed the current world geopolitical map has been shaped by attempts to control the supply of a few of these compounds. Every day of our lives each human spends time and money trying to procure the NPs of their choice. However, despite their overwhelming influence on human culture, they remain poorly understood. Yet a knowledge of NPs can help in our search for new drugs, further the debate about GM manipulation, help us address environmental pollution, and enable a better understanding of drug trafficking. Nature's Chemicals is the first book to describe Natural Products (NPs) in an evolutionary context, distilling the few simple principles that govern the way in which organisms (including humans) have evolved to produce, cope with, or respond to NPs. It neatly synthesizes a widely dispersed literature and provides a general picture of NPs, encompassing evolution, history, ecology, and environmental issues (along with some deeper theory relevant to biochemistry), with the goal of enabling a wider section of the scientific community to fully appreciate the crucial importance of Natural Products to human culture and future survival.

From reader reviews:

Edward Apodaca:

Playing with family in a park, coming to see the water world or hanging out with good friends is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Nature's Chemicals: The Natural Products that Shaped Our World, you could enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh seriously its mind hangout folks. What? Still don't understand it, oh come on its known as reading friends.

Tony You:

This Nature's Chemicals: The Natural Products that Shaped Our World is great guide for you because the content which is full of information for you who also always deal with world and still have to make decision every minute. That book reveal it info accurately using great organize word or we can say no rambling sentences in it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but tough core information with splendid delivering sentences. Having Nature's Chemicals: The Natural Products that Shaped Our World in your hand like finding the world in your arm, information in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen moment right but this guide already do that. So , this really is good reading book. Heya Mr. and Mrs. busy do you still doubt that?

William Rocha:

You are able to spend your free time you just read this book this guide. This Nature's Chemicals: The Natural Products that Shaped Our World is simple to develop you can read it in the area, in the beach, train and also soon. If you did not include much space to bring the particular printed book, you can buy the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Jason Savage:

As we know that book is vital thing to add our knowledge for everything. By a publication we can know everything we would like. A book is a list of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve Nature's Chemicals: The Natural Products that Shaped Our World was filled about science. Spend your spare time to add your knowledge about your technology competence. Some people has diverse feel when they reading a new book. If you know how big selling point of a book, you can really feel enjoy to read a guide. In the modern era like now, many ways to get book you wanted.
