Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing)

Li Deng, Dong Yu

Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) Li Deng, Dong Yu

Deep Learning: Methods and Applications provides an overview of general deep learning methodology and its applications to a variety of signal and information processing tasks. The application areas are chosen with the following three criteria in mind: (1) expertise or knowledge of the authors; (2) the application areas that have already been transformed by the successful use of deep learning technology, such as speech recognition and computer vision; and (3) the application areas that have the potential to be impacted significantly by deep learning and that have been benefitting from recent research efforts, including natural language and text processing, information retrieval, and multimodal information processing empowered by multi-task deep learning. Deep Learning: Methods and Applications is a timely and important book for researchers and students with an interest in deep learning methodology and its applications in signal and information processing. "This book provides an overview of a sweeping range of up-to-date deep learning methodologies and their application to a variety of signal and information processing tasks, including not only automatic speech recognition (ASR), but also computer vision, language modeling, text processing, multimodal learning, and information retrieval. This is the first and the most valuable book for "deep and wide learning" of deep learning, not to be missed by anyone who wants to know the breathtaking impact of deep learning on many facets of information processing, especially ASR, all of vital importance to our modern technological society." - Sadaoki Furui, President of Toyota Technological Institute at Chicago, and Professor at the Tokyo Institute of Technology.

From reader reviews:

Jeffrey Sandoval:

Book is definitely written, printed, or illustrated for everything. You can know everything you want by a book. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading expertise was fluently. A e-book Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) will make you to possibly be smarter. You can feel far more confidence if you can know about anything. But some of you think this open or reading any book make you bored. It is not make you fun. Why they can be thought like that? Have you in search of best book or appropriate book with you?

Carissa Taylor:

What do you consider book? It is just for students since they're still students or the item for all people in the world, the particular best subject for that? Only you can be answered for that question above. Every person has distinct personality and hobby for every single other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing). All type of book could you see on many sources. You can look for the internet methods or other social media.

Nola Schroeder:

The experience that you get from Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) will be the more deep you rooting the information that hide within the words the more you get considering reading it. It does not mean that this book is hard to know but Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) giving you enjoyment feeling of reading. The article author conveys their point in a number of way that can be understood by simply anyone who read the idea because the author of this guide is well-known enough. This book also makes your personal vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this particular Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) instantly.

Irvin Ehlers:

You can get this Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) by browse the bookstore or Mall. Simply viewing or reviewing it may to be your solve problem if you get difficulties for your knowledge. Kinds of this publication are various. Not only by means of written or printed but in addition can you enjoy this book by simply e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose right ways for you.
