**BUT WILL HOMO SAPIENS SURVIVE?**

The year is 2065. Environmental and social chaos are destroying all life on earth. Food supplies have dwindled to almost nothing. The wealthiest live in gated cities; everyone else ekes out an existence in gang-ruled shanty towns.

Michael Khan, a geneticist struggling to save his wife from a deadly virus, is recruited by a secret organization to engineer the next stage in the evolution of Homo sapiens: highly immune to disease and extremely cooperative.

When the military learns of his research, they hire him to help create a bio-weapon to be used against invading forces. However, the military has its own agenda, and Michael soon learns that nobody, not even his own government, can be trusted.
