Multimodal Surveillance: Sensors, Algorithms, and Systems

Multimodal Surveillance: Sensors, Algorithms, and Systems

Multimodal surveillance is the next-generation of surveillance technology, combining traditional video and audio surveillance with state-of-the-art sensors. These systems can identify at great distances approaching vehicles or scan crowds of people to pinpoint a specific individual. Once solely used by the military, they are becoming more widely used by law enforcement, business, and even high-end homeowners. This cutting-edge resource brings together the field's leading experts who guide researchers, designers, engineers, and developers through this multifaceted technology. It discusses the latest high-end sensors for extremely accurate surveillance, as well as low-cost sensing solutions. Designers get insight into new powerful algorithms that integrate sensor data to provide meaningful information. Engineers and developers benefit from an in-depth examination of architectures, performance, and systems evaluation.

From reader reviews:

Helen McCormick:

Now a day those who Living in the era everywhere everything reachable by talk with the internet and the resources in it can be true or not demand people to be aware of each info they get. How individuals to be smart in receiving any information nowadays? Of course the answer is reading a book. Studying a book can help folks out of this uncertainty Information mainly this Multimodal Surveillance: Sensors, Algorithms, and Systems book because this book offers you rich data and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

Destiny Hunt:

Reading a guide tends to be new life style in this particular era globalization. With studying you can get a lot of information that can give you benefit in your life. Together with book everyone in this world could share their idea. Guides can also inspire a lot of people. Lots of author can inspire all their reader with their story or their experience. Not only the story that share in the books. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors nowadays always try to improve their proficiency in writing, they also doing some research before they write to the book. One of them is this Multimodal Surveillance: Sensors, Algorithms, and Systems.

Geraldine Bagley:

This Multimodal Surveillance: Sensors, Algorithms, and Systems is great publication for you because the content that is certainly full of information for you who also always deal with world and possess to make decision every minute. This book reveal it facts accurately using great coordinate word or we can say no rambling sentences in it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but challenging core information with attractive delivering sentences. Having Multimodal Surveillance: Sensors, Algorithms, and Systems in your hand like obtaining the world in your arm, details in it is not ridiculous one particular. We can say that no e-book that offer you world with ten or fifteen small right but this e-book already do that. So , this really is good reading book. Hi Mr. and Mrs. active do you still doubt that?

Anne Shivers:

Reading a book being new life style in this yr; every people loves to study a book. When you read a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, along with soon. The Multimodal Surveillance: Sensors, Algorithms, and Systems offer you a new experience in studying a book.
