Robert W. Ghrist, Philip J. Holmes, Michael C. Sullivan

Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics) Robert W. Ghrist, Philip J. Holmes, Michael C. Sullivan

The closed orbits of three-dimensional flows form knots and links. This book develops the tools - template theory and symbolic dynamics - needed for studying knotted orbits. This theory is applied to the problems of understanding local and global bifurcations, as well as the embedding data of orbits in Morse-smale, Smale, and integrable Hamiltonian flows. The necessary background theory is sketched; however, some familiarity with low-dimensional topology and differential equations is assumed.

From reader reviews:

Rachel Robertson:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each publication has different aim as well as goal; it means that e-book has different type. Some people experience enjoy to spend their a chance to read a book. They are really reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or even exercise. Well, probably you'll have this Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics).

Nellie Wellborn:

A lot of people always spent their very own free time to vacation or go to the outside with them family or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book that you simply read you can spent the whole day to reading a publication. The book Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics) it is rather good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. When you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore very easily to read this book out of your smart phone. The price is not very costly but this book has high quality.

Jacqueline Morrison:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. Often the book that recommended for your requirements is Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics) this publication consist a lot of the information in the condition of this world now. This kind of book was represented just how can the world has grown up. The words styles that writer value to explain it is easy to understand. Often the writer made some research when he makes this book. This is why this book suitable all of you.

Sue Randall:

Guide is one of source of know-how. We can add our knowledge from it. Not only for students and also native or citizen have to have book to know the change information of year for you to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, could also bring us to around the world. With the book Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics) we can

get more advantage. Don't you to definitely be creative people? Being creative person must want to read a book. Simply choose the best book that appropriate with your aim. Don't be doubt to change your life at this book *Knots and Links in Three-Dimensional Flows (Lecture Notes in Mathematics)*. You can more appealing than now.
