Geology and Geochemistry of Oil and Gas, Volume 52 (Developments in Petroleum Science) L.

Buryakovsky, N.A. Eremenko, M.V. Gorfunkel, G.V. Chilingarian

This book discusses the progress that is being made through innovations in instrumental measurements of geologic and geochemical systems and their study using modern mathematical modeling. It covers the systems approach to understanding sedimentary rocks and their role in evolution and containment of subsurface fluids.

Fundamental aspects of petroleum geology and geochemistry, generation, migration, accumulation, evaluation and production of hydrocarbons are discussed with worldwide examples. Various physical and chemical properties of subsurface waters, crude oils and natural gases are described which is especially important to production engineering. Among various properties of liquid and gaseous hydrocarbons the most important are wettability affecting production characteristics and ultimate recovery; relative permeability affecting reservoir fluid flow to the production wells; density differences between immiscible fluids which affects gravity drainage; viscosity of subsurface fluids affecting the relative mobility of each fluid; and fluid chemistry, which affects the absorption, ultimate recovery and monetary value of produced hydrocarbons.

Discussion of the formation and accumulation of hydrocarbons includes (1) the changes in the chemical composition of hydrocarbons that originate from the debris of living plants and organisms to form crude oil and natural gas; (2) the origin of hydrocarbons in different areas of a single reservoir; (3) the conditions, which determine the distribution of water, oil and gas in the reservoir; (4) the migration of subsurface fluids until they eventually accumulate in isolated traps; (5) discussion of the traps as a function of sedimentary geology and tectonics. This is based on the systems approach to the specific geologic and geochemical systems using analytical and statistical principles and examples of modern mathematical modeling of static and dynamic systems.

* Discusses fundamental aspects of petroleum geology and geochemistry, and generation, migration, accumulation, evaluation and production of hydrocarbons

* Presents a systems approach to the specific geologic and geochemical systems

From reader reviews:

Lowell Oliver:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the Mall. How about open or read a book allowed Geology and Geochemistry of Oil and Gas, Volume 52 (Developments in Petroleum Science)? Maybe it is being best activity for you. You understand beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have additional opinion?

Brian Bauer:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or all their friends. Usually they doing activity like watching television, gonna beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Can be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the publication untitled Geology and Geochemistry of Oil and Gas, Volume 52 (Developments in Petroleum Science) can be very good book to read. May be it might be best activity to you.

Louis Cline:

People live in this new moment of lifestyle always aim to and must have the free time or they will get wide range of stress from both daily life and work. So , if we ask do people have time, we will say absolutely yes. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the book you have read is usually Geology and Geochemistry of Oil and Gas, Volume 52 (Developments in Petroleum Science).

George Jamison:

What is your hobby? Have you heard that question when you got pupils? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And you also know that little person like reading or as reading through become their hobby. You should know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. Numerous books that can you take to be your object. One of them is actually Geology and Geochemistry of Oil and Gas, Volume 52 (Developments in Petroleum Science).
