The Oxford Handbook of Philosophy of Death (Oxford Handbooks)

Death has long been a pre-occupation of philosophers, and this is especially so today. *The Oxford Handbook of Philosophy of Death* collects 21 newly commissioned essays that cover current philosophical thinking of death-related topics across the entire range of the discipline. These include metaphysical topics--such as the nature of death, the possibility of an afterlife, the nature of persons, and how our thinking about time affects what we think about death--as well as axiological topics, such as whether death is bad for its victim, what makes it bad to die, what attitude it is fitting to take towards death, the possibility of posthumous harm, and the desirability of immortality. The contributors also explore the views of ancient philosophers such as Aristotle, Plato and Epicurus on topics related to the philosophy of death, and questions in normative ethics, such as what makes killing wrong when it is wrong, and whether it is wrong to kill fetuses, non-human animals, combatants in war, and convicted murderers.

With chapters written by a wide range of experts in metaphysics, ethics, and conceptual analysis, and designed to give the reader a comprehensive view of recent developments in the philosophical study of death, this *Handbook* will appeal to a broad audience in philosophy, particularly in ethics and metaphysics.
